Undergone **4 months** training on Testing Tools - Real time Project from **Naresh i Technologies,** Hyderabad.

As part of Training, I underwent intensive Training on Manual and Automation Testing as detailed below:

- Understanding Software Requirement Specification and identifying the required Test Scenarios.
- Well versed with SDLC, STLC and Defect Life Cycle.
- Experience in executing Test Cases to test the application functionality against the requirements manually.
- Defect Reporting and Tracking using Automation Tools Bugzilla .
- Good Knowledge on automation tool Selenium.
- Good Knowledge on Web Driver.
- Experience in working with testing framework through TestNG.
- Experience in logging Selenium Scripts using Log4j.

IT Skills

Operating Systems: Windows XP, Windows 10

Languages: Core Java and Basic knowledge on SQL

Testing: Manual, Automation(Selenium),API Testing,FrameWorks Cucumber BDD

Automation Testing Tools: Selenium WebDriver, TestNG & Sikuli

Exposure on Tools: Maven, Jenkins, Jira, Postman, Git

Project Experience@ Naresh i Technologies

1. Adactin-Manual Testing

Description:
Using this system user can view and check for various rooms available and simultaneously book them by making online payment via credit card.The system calculates the total cost on booking the services. Once the user makes the payment, system will provide online receipt to the user. User can view the room booking in an effective graphical user interface. Since room bookings will be displayed in effective graphical user interface user will get to know which rooms are booked and how many rooms are available for booking. Using this application user can select the room according to his preference. The rooms which are already will be disabled and the rooms which are available user just have to select it and then proceed to payment option. Once user makes the payment system will generate receipt and it will be sent to respective users email id and it will be reported to the admin, when user visits the hotel, he must show the receipt for the accommodation.

Roles and Responsibilities:

- Understanding the Requirements and Functional Specifications of the Project.
- Identified Test Scenarios required for testing
- Prepared and Executed Test Cases as per System Requirements
- Test Management (Test Case Execution and Defect Reporting).
- Extensively performed Manual Testing process to ensure the quality of the software.

Environment:
Java, Servlets,BugZilla.

2. HRMS - Manual and Automation Testing

Client: **Naresh i Technologies**
Description:
HRMS comes as a comprehensive solution for the efficient management and development of your Human Resource. It will assist you in the complex and strategic process of managing this crucial resource of your enterprise. Based on modular architecture, it facilitates a vast range of HR activities, with features that reflect the main HR management activities.

Roles and Responsibilities:

- Understanding the Requirements and Functional Specifications of the Project.
- Identified Test Scenarios required for testing
- Prepared and Executed Test Cases as per System Requirements.
- Selenium was used to generate automated test scripts for functionality.
- Created automation scripts based on Hybrid Framework

Environment:
WebDriver, TestNG ,Java, Servlets,BugZilla.
